

# **BROKEN BRIDGE POND**

**Albany Twp., Oxford Co.  
U.S.G.S. East Stoneham, Me. (7.5')**

## **Fishes**

**Brook trout**

### **Physical Characteristics**

**Area - 18 acres**

**Temperatures:**

**Surface - 72°F**

**Maximum depth - 25 feet**

**24 feet - 45°F**

**Principal fisheries: Brook trout**

**Broken Bridge is a small pond located in the White Mountain National Forest (WMNF) in Albany, Maine. Although it is easily accessible via vehicle, it looks and feels like a remote, mountain pond.**

**The pond develops an oxygen deficiency in the hypolimnion, but a band of cool, oxygenated water exists that is suitable for trout management. The pond has been reclaimed on several occasions to remove competing and predatory fish populations, and has a history of producing a multi-age class trout fishery with brookies up to 18 inches in length. The pond was last reclaimed in 2014 and is expected to produce trout in the 9-16" range as long as other fish species are not illegally introduced. Special regulations are in effect on this water to provide a quality fishery. Anglers should consult their fishing law book before fishing this pond.**

**The pond can be accessed via the Crocker Pond Campground Road, and the WMNF maintains two access points to pond including a small carry-in site at the remote camping site on the western shoreline and a small, dirt ramp at the north end.**

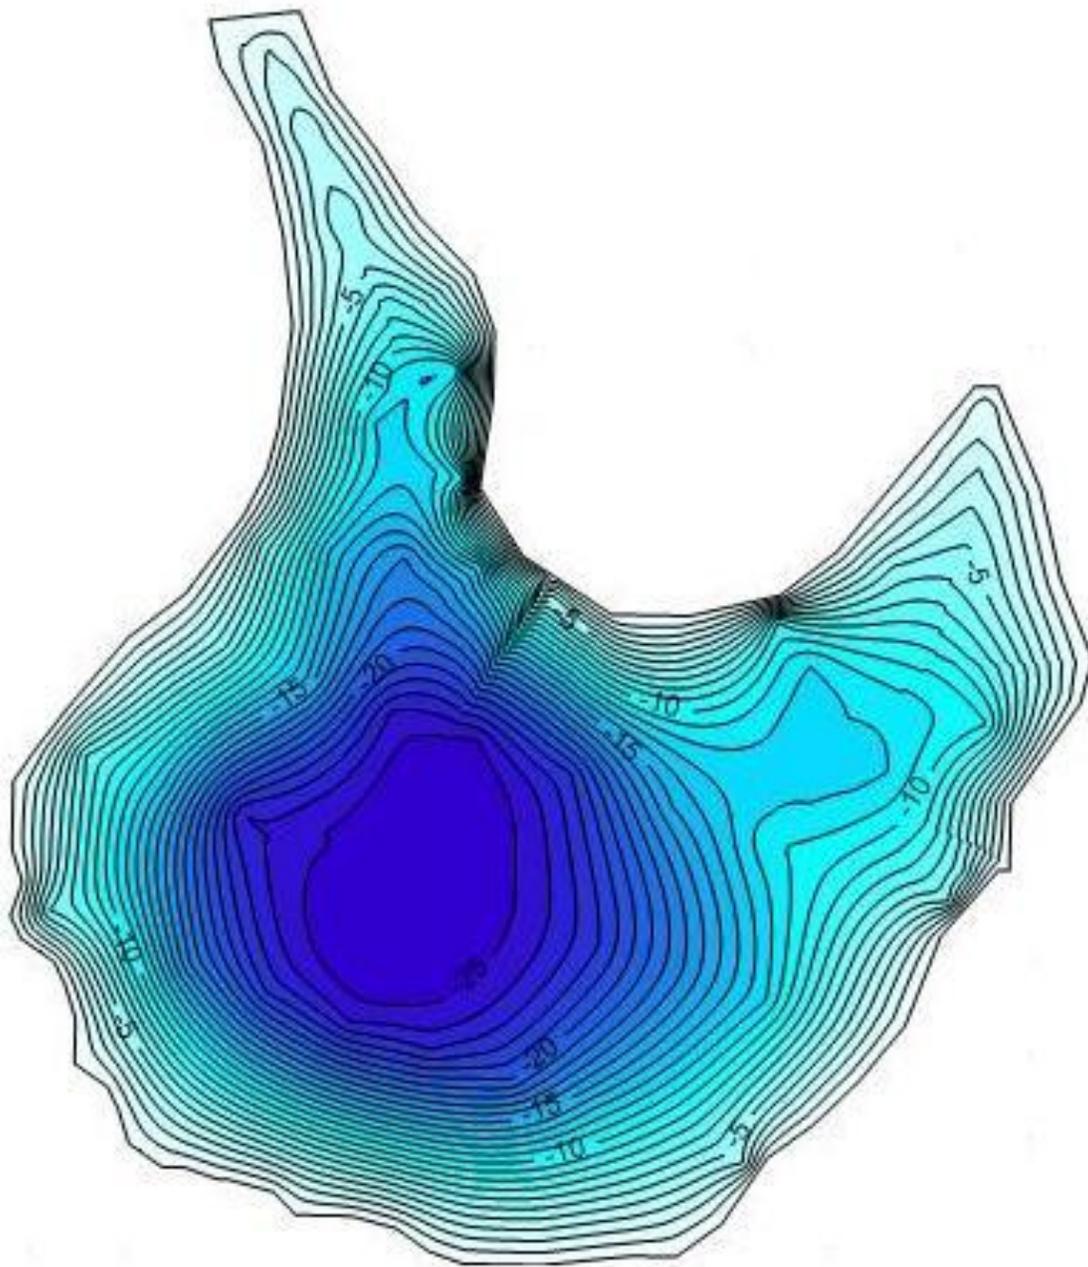

**Surveyed - August 1956**

**(Revised - 1958, 1984, 1994, 2015)**

**Maine Department of Inland Fisheries and Wildlife**

**Funded in part by the Federal Aid in Restoration Act under  
Federal Project F-28-P**
